COVER R mio MILLION DOLLARS TO NEW ENGLAND'S PUBLIC UNIVERSITIES FOR TRANSPORTATION RESEARCH

The New England Transportation Consortium (NETC) is a cooperative effort of the transportation agencies of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. NETC provides sponsorship and oversight for sponsored research at the Universities of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

The NETC 2009 Transportation Research Program is inviting concepts for transportation research projects. The solicitation aims to support research proposals that will contribute to the development of strategic and tactical solutions to transportation problems in the New England region.

SOLAR STREET LIGHTS TO IMPROVE SECURITY AT THE UNIVERSITY OF MASSACHUSETTS DARTMOUTH

The University of Massachusetts Dartmouth has installed new solar powered street lights on the main campus.

The installation is part of a broader effort to improve campus safety and reduce energy costs. The solar powered lights will provide improved lighting during nighttime hours, enhancing the security and well-being of students, faculty, and staff.

RESEARCH HIGHLIGHTS

Performances and Experiences of a Twin-Pavement Section Used on a Geopolitical Environment. A case study in the Middle East.

This study investigates the performance and experiences of a twin-pavement section used on a geopolitical environment in the Middle East. The research highlights the importance of considering cultural and environmental factors in pavement design.

This research focuses on field studies of contaminant solute transport in subsurface materials under dynamic flow conditions. The study reviews the current understanding of contaminant transport mechanisms and their implications for environmental management.

Research News is published in electronic format by the New England Transportation Consortium for informational purposes and is not intended for use in legal disputes.
